Professional Summary

Passionate Python developer with strong skills in Django, databases, JavaScript, HTML, Git, and Agile methodology. A mechanical engineering graduate with a solid foundation in software engineering principles. Quick to learn new technologies and effective in both team-based and independent environments.

Experience

Python Developer at ZinfogCodelabs

Apr 2024 - Jun 2026

- Developed and maintained various high-impact projects using Python, ensuring robust functionality and seamless user experiences.
- Demonstrated expertise in server-side management by handling deployments and troubleshooting, ensuring seamless project operations and minimizing downtime.

Python Developer at Noviindus Technologies LLP

Jan 2023 - Mar 2024

- Designed and developed scalable web applications using Python, Django, and MySQL, including job portals and e-commerce platforms for clients in the Middle East and India.
- Implemented secure authentication systems for multi-user roles (e.g., job seekers, employers) and integrated third-party services like Firebase OTP and HDFC Payment Gateway.
- Developed dynamic and responsive user interfaces using Django templates, AJAX, JavaScript, and jQuery, improving user engagement and interaction.

Python Developer at ANT Colony Technologies Pvt. Ltd

May 2022 - Dec 2022

- Assisted in the development and maintenance of web applications using Python and Django, contributing to the successful delivery of multiple client projects.
 - Collaborated with senior developers to implement RESTful APIs, improving data exchange and system integration across various platforms.
-

Projects

POS Application with Odoo Integration

Built a backend system for a POS (Point of Sale) application using Django REST Framework, designed to interface with an Odoo ERP system. Focused on implementing REST APIs and automated scheduled tasks using crontab for syncing data between the Django application and Odoo (handled by another team). Integrated multiple modules such as sales, invoices, quotations, product batches, and customer management, and structured endpoints to support both listing and transactional operations.

Key Contributions:

- Developed API endpoints for CRUD operations across multiple modules
- Implemented scheduled tasks using crontab to trigger periodic data sync
- Supported two-way data exchange from the Django side (fetching/sending to Odoo server)

- Handled master data (tax, country, UOM, variants) and transactional data (orders, returns, invoices)
- Designed branch-wise and customer-wise sales data APIs.

Multi-User E-Commerce & Service Platform

Developed the backend of a Django-based platform supporting multiple user roles (Admin, Franchise, Business, Customer, BaseAdmin), offering features like service booking, blood donation requests, advertisements, spin-to-win rewards, notifications, and online payments.

Key Contributions:

- Designed and developed REST APIs using Django REST Framework for customer and business modules
- Implemented service booking flow with business-side approval
- Built modules for blood donation, advertisements, customer reviews, and posts/news updates
- Integrated Firebase Cloud Messaging (FCM) and WebSockets for real-time push notifications

Sales Performance Dashboard (Django REST API)

Developed a Sales Performance Dashboard using Django REST Framework to track and analyze franchise outlet sales data. Key features include:

- User Authentication: JWT-based login, password reset, and role-based access control (Admin/Outlet users).
- Sales Data Management: CRUD operations for sales records with financial year (April-March) support.
- Target Tracking: Dynamic calculation of achieved vs. target sales, with visual progress metrics.
- Winner Banner System: Automated badge assignment for outlets crossing sales milestones.

Custom Sportswear E-Commerce Platform

Built the backend for an e-commerce platform using Django and Django REST Framework to support customizable sportswear orders, user management, and secure payments.

Key Contributions:

- Developed REST APIs for products, categories, user authentication, and order management
- Implemented customizable jersey logic (name, number, logo, size options) via backend
- Integrated payment gateways (Razorpay, CCAvenue) for secure transaction processing
- Handled order workflows including status updates, returns, and delivery tracking
- Designed admin-side APIs for managing inventory, bulk orders, and customer inquiries

Key Skills

- Server Side: Python, Django, FastAPI, Flask
- Client Side: JavaScript, JQuery, CSS3, HTML5
- Database: MySQL, SQLite, PostgreSQL, MongoDB
- Asynchronous & Scheduling: Celery, Crontab, WebSocket
- Version Control: Git
- Project Management: Agile
- Payment Gateway Integrations: Razorpay, CCAvenue, PhonePe, Foloosi
- Soft Skills: Problem-solving skills, Communication skills
- Tools & Frameworks: CKEditor, MPTT, SonarQube

Education

- B.Tech. in Mechanical Engineering (Calicut University, Kerala, India)
- Python Full stack Course - Expertzlab Technologies Pvt Ltd, Kochi, India
- Practical Python for Beginners – Pluralsight
